## FULL YEAR RESULTS - 31 December 2024

BSP Financial Group Limited (BSP) reported a statutory net profit after tax result of K1.038 billion [A\$408m] for the full year of 2024, a 17% increase compared to FY23.

BSP's FY24 statutory profit growth was driven by a strong lift in volumes and revenue in nearly all our businesses, coupled with a large improvement in our Bad and Doubtful Debts provision, as well as the impact of the Additional Company Tax settlement in the first half of 2024.

Key FY24 financial highlights included:

- BSP's net operating income increased by 8% to K3.0 billion [A\$1.2b].
- Net interest income grew to K2.0 billion [A\$773m], a 7% increase over FY23.
- Fees and commission income grew by 9% to 387 million [A\$152m]. Growth was largely driven by increased transaction volume in our digital channels.
- FX income grew to K561 million [A\$221m] a 22% [K103m, A\$40m] increase over FY23. FX income represented 19% of FY24 income.
- Total expenses increased to K1.3 billion [A\$499m], with the execution of our modernisation and ongoing technology strategy, channels and inflation contributing to this increase. While BSP's cost to income ratio lifted from 37.8% in FY23, to 41.3% in FY24, when we exclude the investments in our modernisation initiatives, it was stable at 38.2%.
- The Group's total assets grew by 0.5% to K37.1b [A\$14.9b] over the prior year.
- Credit quality improved in FY24, with delinquency rates down 80bps to 2.8% and provisions to loans falling 80bps to 3.3%.

The Group results were further impacted by a reduction in company tax for all commercial bank's profits above K300 million. In line with International Accounting Standards, a one-off K36 million increase in tax expense was recognised, resulting from the decrease in deferred tax balances.
